

Tri-County School Corporation goes from Surplus to STEM

How Classform and our Technology Buyback Program enabled Tri-County to Innovate.

THE OPPORTUNITY

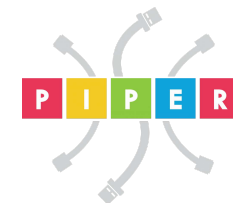

In spring 2017, Classform was in conversation with Tri-County School Corporation in Wolcott, Indiana. Technology Director, Shannon Kelly, wondered, "We have 250 iPads. What will we do with them?"

THE SOLUTION

Classform's innovation-centered technology buyback program provided Tri-County with a multi-layered solution. They were provided monetary compensation through the program, adding to their overall budget, and given additional innovation credits to build on their STEM initiatives.

The process was swift; initial conversations took place in the spring, free on-site device packaging and pick-up in July, and new STEM programs were launched on the very first day of classes the same year. Shannon described the program as, "Very efficient - smooth and easy"

By working with Classform, Tri-County School Corporation was able to take **outdated, surplus technology and create a robust, STEM program.**

ABOUT CLASSFORM

Classform is a **STEM company** and leader in promoting technology initiatives in K-12 schools. We work very closely with districts big and small to support their innovative learning environments.

Contact our team to learn more about the Technology Buyback Program and how your school can go from Surplus to Innovation.
